Cake Information

ALLERGENS NOTE

The cakes are prepared in a facility that handles cereals containing gluten, various nuts, milk-based products, soya and eggs.

We make every attempt to identify ingredients that may cause allergic reactions. Every effort is made to instruct our staff on the severity of food allergies. In addition, we highlight items with possible allergen-containing ingredients on our publicity and ingredients list.

We take great care to use separate equipment when preparing nut-free or gluten-free cakes. However, all our cakes are made in the same kitchen so please consider this if you have a severe allergy. There is also a possibility that manufacturers can change the formulation at any time, without notice. Customers concerned with food allergies need to be aware of this risk.

Because we want your cake eating experience to be perfect, we put extra effort into checking all our deliveries of nuts and fruit by hand for pieces of shell or fruit stone. However, please be vigilant in case any have slipped past our checks.

STORAGE

Our cakes are truly homemade. Please follow these guidelines to enjoy them at their very best:

In the fridge: Our cakes stay fresh for a week (apart from the cakes covered with cream cheese frosting which stay fresh for 5 days).

In the freezer: Freeze on day of delivery. They can be stored for up to 3 months. Allow 3 hours to defrost. They are best eaten within 5 days.

CUTTING

Round Cakes: Use a large, very sharp knife. Push point into centre of cake and use a gentle sawing action to cut.

Square Bakes – 12 Slices: They're easier to cut cold from the fridge. Pull open the corners of the foil tray so it's flat, slide a fish slice underneath and push onto a chopping board. Cut with a large sharp knife.

Loaves – cut into 10 slices: Remove from greaseproof wrapping, place loaf on a board. We suggest you cut at room temperature using a sharp knife.

DISPLAY

Most of our cakes can be stored at ambient temperature.

However we use cream cheese frosting for some of our cakes, these cakes can be displayed at ambient temperature for 4 hours only and then must be sold from a chilled display.
